Title	Morphological characteristics and molecular markers of distyly in <i>Primula obconica</i>

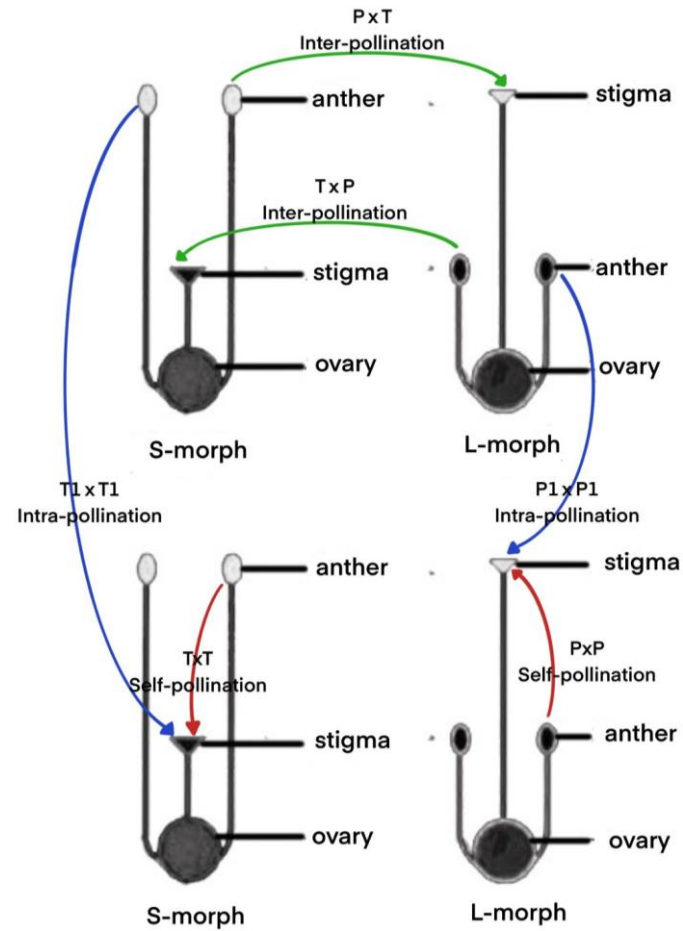

Figure S1: Schematic diagram of three different types of artificial pollination of *P. obonica*. The direction of the arrow represents the direction of pollen transfer. P represents L-morph and T represents S-morph.

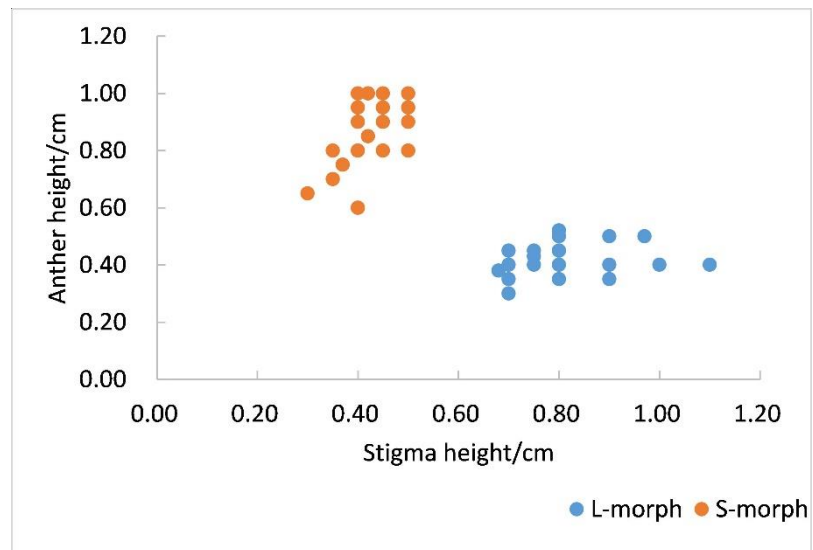

Figure S2: Relationship between stigma height and anther height of *P. obconica* distyly

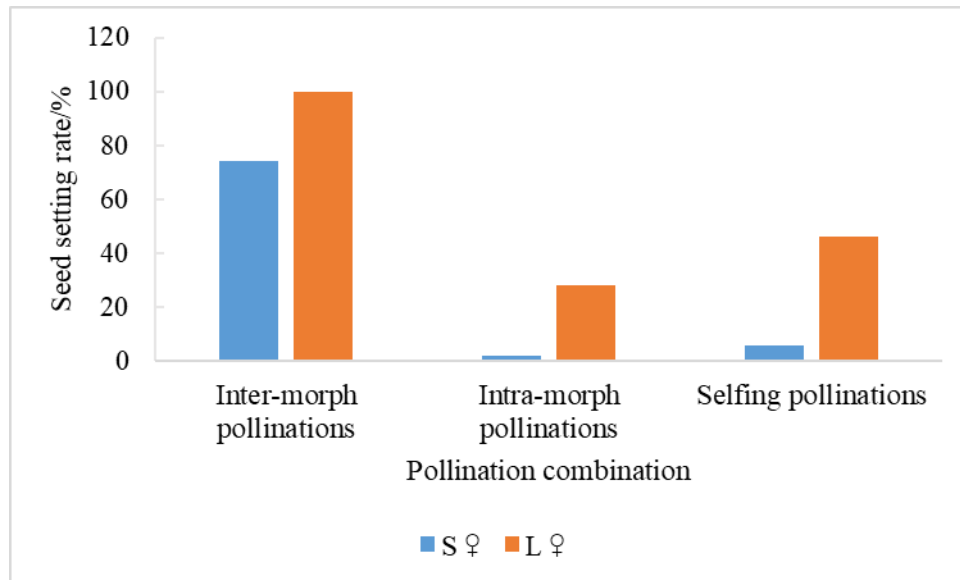

Figure S3: Fruit setting rate of *P. obconica* under different pollinations
