

The following shows the cropped gels/blots.

Figure 4A: Effect of MIA on NMDAR2B protein in the spinal cord by western blot analysis.

NMDAR2B

1. Blots (The first line)

2. Markers+Blots (The first line)

GAPDH

1. Blots

2. Markers+Blots

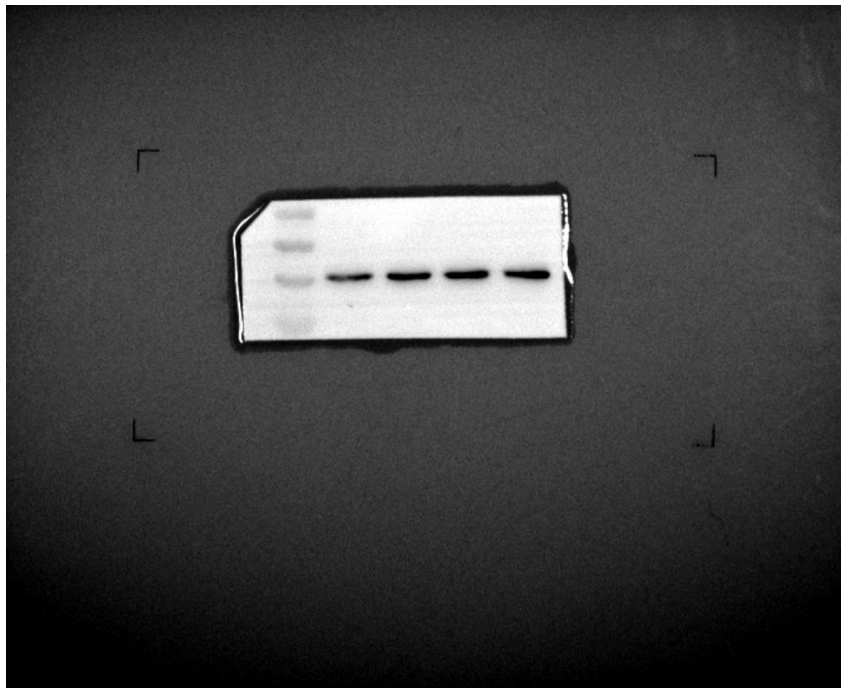

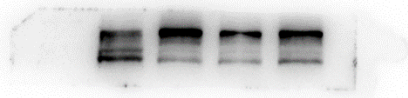

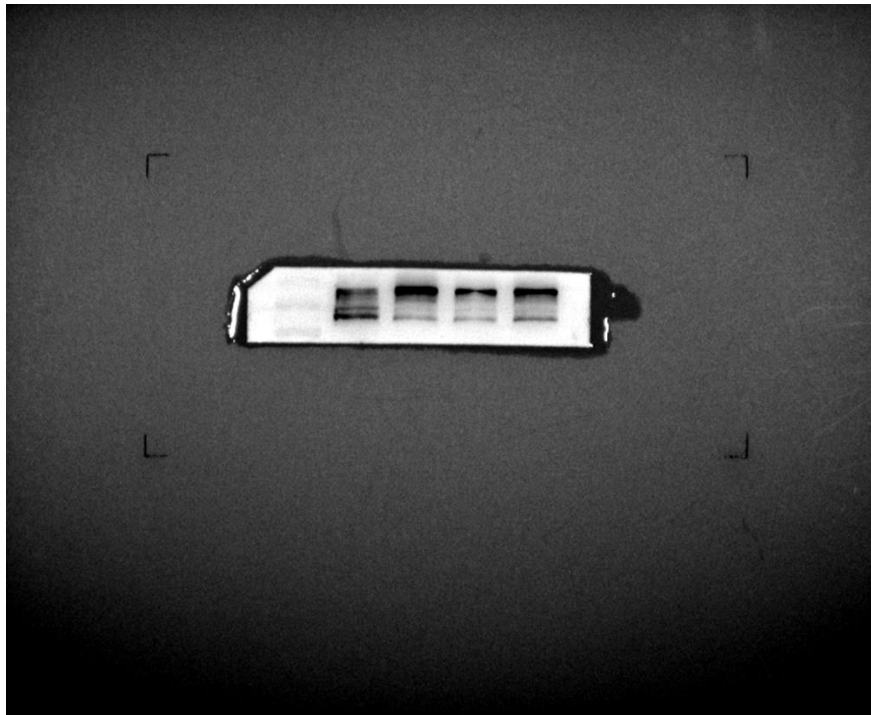

Figure 4B: The expression of NMDAR2B protein in the spinal cord was measured at 14 days after tDCS treatment.

NMDAR2B

1. Blots (The first line)

2. Markers+Blots (The first line)

GAPDH

1. Blots

2. Markers+Blots
