

Table 3. The association between brain-predicted OCD risk probabilities and clinical features in a discovery set (stepwise regression).

(A) Adult sample, Discovery set (OCD = 379) (Adjusted = 15.15%)				
Variable	Beta	F	P value	η^2
Site		6.996	7.72E-08	0.118
Age	0.011	16.152	7.10E-05	0.042
Hoarding	0.017	8.316	0.004	0.022
Childhood-onset	-0.010	4.172	0.042	0.011
Current Depression	0.015	2.372	0.124	0.006
(B) Pediatric sample, Discovery set (OCD =55) (Adjusted = 32.89%)				
Variable	Beta	F	P value	η^2
Site		11.796	6.57E-05	0.325
Depression	-0.13142	5.062	0.029	0.094
Aggression, Checking	-0.0645	4.619	0.037	0.086
Age	0.02355	1.896	0.175	0.037
