

Missing Data Patterns

We carefully inspected at which times data were missing across diagnostic groups (BPD, DD, NCC). The figures below illustrate the number of missing values at different times of the day. For example, in the BPD group only 4 out of 42 participants responded to the first prompt at 9 AM. The data displayed in the figures below suggests that across groups most responses were missed in the morning.

Missing Data (BPD group)

Missing Data (DD group)

Missing Data (NCC group)
