

Additional file 5. Addition to the questionnaire to certified prosthetics and orthotics/shoe technicians participating in a study of foot examinations at Orthopaedic Technology and the implementation of D-Foot

The questionnaire contains questions on foot examinations you have performed on patients with diabetes and foot complications. Answer the questions by marking the answer that is most suitable. If you are unsure, you should still mark the answer that feels most correct. Put a cross in the square like this ☒

21a) How long did it take to record the visit in the medical record system (Pilot) when you examined the feet using the D-Foot method?

- ☐ Less than 5 minutes
- ☐ 6-10 minutes
- ☐ 11-15 minutes
- ☐ 16-20 minutes

21b) How long did it take to record the visit in Pilot when you examined the feet in the established way?

- ☐ Less than 5 minutes
- ☐ 6-10 minutes
- ☐ 11-15 minutes
- ☐ 16-20 minutea
