

Online Resource 2 Phylogenetic trees from Bayesian inference based on the ITS region of *Bipolaris* species. Bayesian posterior probability (B-PP) values >50% and bootstrap values obtained using the maximum likelihood method (ML-BS) >50% are shown at the nodes (B-PP/ML-BS). The tree is rooted with *Curvularia buchloes* CBS 246.49 and *C. subpapendorffii* CBS 656.74. The isolates obtained in this study are shown in bold font. ^T ex-type
