

Table 2 Chemotherapeutic agents and regimens used

Name	N
Cytotoxic therapy	
- Temozolomide	21
- HIT-GBM-D ^a	5
- Etoposide	4
- Temozolomide, Vinorelbine	3
- HIT-GBM-C ^b	2
- BB SFOP ^c	2
- Vinorelbine	1
- Fotemustine	1
- Carboplatin, Cisplatin, Etoposide	1
- Lomustine, Concavine	1
- Ifosfamide, Etoposide	1
- Vincristine, Cisplatin, Lomustine	1
Targeted therapy	
- mTOR-inhibitor (Everolimus or Sirolimus)	15
- Bevacizumab	4
- Nimotuzumab	2
- Dasatinib	2
Combination	
- Nimotuzumab, Bevacizumab, Irinotecan, Carboplatin, Vincristine, Thalidomide	1
Experimental therapy^d	6

^a HIT-GBM-D: vincristine, cisplatin, etoposide, ifosfamide, lomustine, prednisone, +/- methotrexate

^b HIT-GBM-C: vincristine, cisplatin, etoposide, ifosfamide

^c BB SFOP: carboplatin, procarbazine, vincristine, cyclophosphamide, etoposide, cisplatin

^d 2x immunotherapy, 1x CED valproate, 1x cannabis oil, 1x intra-arterial immunotherapy/chemotherapy, 1x sodium bicarbonate); these therapies were performed outside Belgium, whether or not at the patient's / parents' own initiative
