Challenging the Universality of Heatwave Definitions: Gridded temperature discrepancies across climate regions

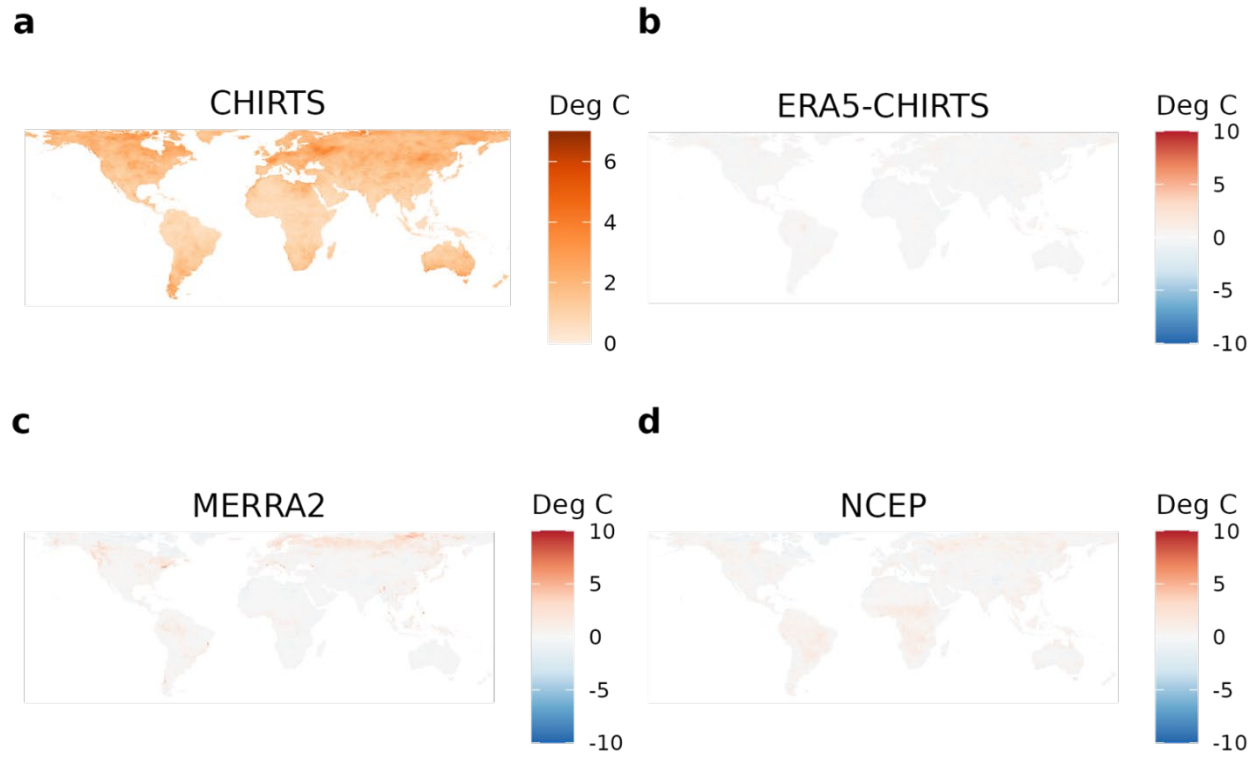

Figure SI-1: Length of the tail of daily maximum temperatures 1983-2015, calculated as the 99.9th percentile minus the 99.5th percentile. Absolute values are shown in (a) for the CHIRTS dataset, and the difference between the reanalysis and CHIRTS is shown for (b) ERA5, (c) MERRA2, and (d) NCEP.
