

Additional file 3: Table S3. Correlations between secreted proteins and *M.tb* generation time during the 48 to 72h incubation period (Protein vs. Growth Rate correlations).

All values are r correlations, with + or – indicating whether the correlation is positive (longer generation time) or negative (shorter generation time).

| Proteins | 2 hours | | 24 hours | | 72 hours | |
|----------|--------------------|--------------------|--------------------|--------------------|---------------------|--------------------|
| | Correlation | P value | Correlation | P value | Correlation | P value |
