

Kikuchi S, Setsuko S, Nagamitsu T & Suzuki W. Molecular phylogenetic analyses identify the process of speciation of endemic willow species in the Japanese Archipelago. *Journal of Plant Research* . Corresponding author: Kikuchi S, Forestry and Forest Products Institute, kikusato@affrc.go.jp

Online Resource 4 Marginal likelihood estimates of each molecular clock model obtained using the nested sampling method.

Clock model	Marginal likelihood	S. D.
Strict clock (STR)	-5095.52	6.298
Log normal relaxed clock (RCLN)	-5123.45	6.638
Exponential relaxed clock (RCEP)	-5083.84	6.681
Random local clock (RLC)	-5128.86	6.54
