

Table 3. Chi-Square analysis of associations between demographic factors and postpartum follow-up

Variable	df	Postpartum Follow-up (%)		χ^2	P
		Yes n=214	No n=89		
Age	1			0.09	0.76
Advanced Maternal Age (35+)		72.72	27.27		
<35		69.83	30.17		
Delivery Route	1			0.24	0.62
Cesarean		72.44	27.56		
Vaginal		69.14	30.86		
Parity	1			1.56	0.21
Parity 0-1		73.08	26.92		
Parity 2+		65.26	34.74		
BMI	1			0.25	0.62
<30		68.39	31.61		
30+		72.11	27.88		
Race/Ethnicity	1			0.57	0.45
NH Black		72.69	27.31		
Other Race		65.96	30.04		
Education	1			0.77	0.38
Some college education or more		74.63	25.37		
High School or Less		69.18	30.82		
Birth Country	1			3.68	0.06
Foreign-born		76.28	23.72		
US-born		65.47	34.53		
Employment Status	1			5.19	0.02*
Employed		75.88	24.12		
Unemployed		62.71	37.29		
Insurance Type	1			3.98	0.05*
Medicaid or self-pay		67.73	32.27		
Other		67.73	32.27		
WIC Status	1			0.08	0.78

WIC Participant	70.24	29.76
Non-WIC-participant	72.50	27.50

^aFisher's exact test was used
^c $p \leq 0.001$, ^{**} $p \leq 0.01$, ^{*} $p \leq 0.05$
