## Supplementary figures

[illegible]

Supplementary Fig. S 3 Representative chromatogram of partial CG methylation of the PSA promoter specific for HPrEpiC alleles.

Supplementary Fig. S 5 Data provided by bioinformatics on the expression of kallikrein-related peptidase 3 (KLK3/PSA) in normal and cancer Homo sapiens tissues, as well as some genomic characteristics.

Bar-coloured 54 human tissues.

Supplementary information to Fig. 1

Full-length gel to Fig.1 a.

Supplementary information to Fig. 2

Full-length gel to Fig.2 b.
