ETHICAL REVIEW COMMITTEE Approval Notice

Approval Number: 2023-E373-01

Title: Maternal/fetal outcomes and disease evolution in connective tissue disease: a single center study

Research Contents: Connective tissue disease (CTD) is an autoimmune disease with various and complicated clinical manifestations and repeated course of disease. The incidence rate of women of childbearing age is high, and the monitoring of disease activity and drug treatment during pregnancy are very important. The aim of this study is to explore the outcomes and related risk factors of CTD pregnancy, in order to improve clinical physicians' understanding of CTD combined with pregnancy.

Applicant: ling lei

Application Department: Rheumatology and Clinical Immunology

Date of Application: August 01, 2023

Date of Approval: August 01, 2023

Conclusion: This paper fully considered and protected the rights and interests of the study objects. It meets the criteria of Ethical Review Committee. The Medical Ethics Committee of First Affiliated Hospital of Guangxi Medical University has approved the protocol.
