

Fig. Number of sperm transferred in first five matings ($n= 5$ per treatment) in *Cheilomenes sexmaculata*. For each box plot, the lower and upper box lines indicate 25% and 75% of scores falling beyond the lower and upper quartiles, respectively; the line in a box shows the median score; the '└' and '┘' are the lower and upper whiskers representing scores outside the 50% middle. Circles represent outliers of minimum and maximum scores.
