

Age of the oldest *Homo sapiens* from eastern Africa

Céline M. Vidal, Christine Lane, Asfawossen Asrat, Dan N. Barfod, Emma L. Tomlinson, Amdemichael Zafu Tadesse, Gezahegn Yirgu, Alan Deino, William Hutchison, Aurélien Mounier, Clive Oppenheimer

Supplementary information guide

1. Methods
2. Supplementary Figure S1. Field photographs of Late Middle Pleistocene tuffs at Konso
3. Supplementary data
 - Table S1. Average normalised major element and trace element composition of samples analysed for this study
 - Table S2. Single crystal $^{40}\text{Ar}/^{39}\text{Ar}$ ages for unit A and unit C of the Qi2 ignimbrite of Shala
 - Table S3. $^{40}\text{Ar}/^{39}\text{Ar}$ raw data for the Qi2 samples
 - Table S4. $^{40}\text{Ar}/^{39}\text{Ar}$ air standards
 - Table S5. $^{40}\text{Ar}/^{39}\text{Ar}$ blanks
 - Table S6. Average compositions of EPMA secondary standards for years 2018–2019
 - Table S7. Standard compositions for LA-ICP-MS analyses
 - Table S8. Major element composition of tephra samples
 - Table S9. Trace element composition of tephra samples
