

Supplementary Figure 1 - Developmental Trajectories for a) Total Left Cerebellar Cortex, b) Total Right Cerebellar Cortex, c) Total Left Cerebellar White Matter, d) Total Right Cerebellar White matter, and e) Total Subcortical Gray Matter Volumes. Error bars represent 95% confidence intervals for the estimated marginal means. Regressions were corrected for age, sex, self-reported race/ethnicity, and SES factors (combined family income, highest parental education, and impact of poverty). Asterisks (*) indicate groups with significantly different *group by timepoint* interaction effects, relative to the non-depressed control group ($p_{\text{adjusted}} < 0.05$).

Supplementary Figure. 2 - Developmental trajectories for a) Anxious-Depression, b) Depression-Syndrome, c) UPPS Negative Urgency, d) UPPS Lack of Perseverance, e) Lack of Planning, and f) BIS Sum Scores. Error bars represent 95% confidence intervals for the estimated marginal means. Regressions were corrected for age, sex, self-reported race/ethnicity, and SES factors (combined family income, highest parental education, and impact of poverty). Asterisks (*) indicate groups with significantly different *group by timepoint* interaction effects, relative to the non-depressed control group (p.adjusted < 0.05).
