

The Inappropriate Usage and Marketing of Laundry Sanitizers in Infantile Atopic Dermatitis: A Cross-Sectional Study

Appendix C

The correlation between each issue of the Infants' Dermatitis Quality of Life Index (IDQoL).

The relationship between skin lesion and quality of life in children with infantile AD (N = 267).

Items	Without skin lesion	With skin lesion	P value
IDQoL total score	2 (1, 4)	4 (2, 6)	<0.001
Reported rate of each issue			
Itching	35 (55.6%)	180 (88.2%)	<0.001
Mood	21 (33.3%)	113 (55.4%)	0.002
Speed of falling asleep	46 (73.0%)	153 (75.0%)	0.75
Quality of sleep	24 (38.1%)	95 (46.6%)	0.24
Playing	0 (0%)	41 (21.1%)	<0.001
Enjoying family activities	1 (1.6%)	26 (12.7%)	0.01
Eating	1 (1.6%)	39 (19.1%)	0.001
Treating atopic dermatitis	0 (0%)	44 (21.6%)	<0.001
Dressing	0 (0%)	43 (21.1%)	<0.001
Bathing	0 (0%)	25 (12.3%)	0.003

The results are presented as median (interquartile range) or n (percentage).

AD: atopic dermatitis; IDQoL: Infants' Dermatitis Quality of Life Index.
