† These authors contributed equally to this work.

All I.Q., E.F.C., J.D., M.A., D.M.M., F.M.F., B.R.S., F-J.R., conceived, designed, and wrote the manuscript. E.F.C. carried out spatial analysis and maps. I.Q. and E.F.C. designed and created indices. M.A., D.M.M., F.M.F., B.R.S., I.Q., and F-J.R. collected articles and extracted data for wildlife-vehicle collision.

Supplementary Data 1. Collated wildlife-vehicle collision data. The rate of killed individuals per year was calculated as the fraction of number killed individuals over the number of years.

Supplementary Data 2. Protected areas in the Brazilian Amazon, Africa and Nepal that will be crossed by future road developments and/or affected by a 10-km buffer along the road. Explanation of IUCN category available at:
