

Figure 2: Overall survival

Kaplan-Meier survival plot comparing overall survival between the Surgery group (n=27) and the no surgery group (n=52). The y-axis represents survival probability from 0 to 1.0. The x-axis represents time in months from 0 to 100. The Surgery group is shown in yellow and the no surgery group in blue. A dashed horizontal line is at y=0.5. The p-value is 0.008*.

overall survival (months)

	0	1	2	3	4	5	6	7	8	9	10
With surgery	27	22	14	12	9	3	3	3	2	0	0
Without surgery	52	27	14	8	5	4	2	0	0	0	0
	no. at risk
