

Supplementary Materials

Table S1. Physician Trust in the Patient Scale – items

Item No.	Description: How confident are you that this patient will...
1.	Provide all the medical information you need?
2.	Let you know when there has been a major change in his or her condition?
3.	Tell you about all medications and treatments he or she is using?
4.	Understand what you tell him/her?
5.	Follow the treatment plan you recommend?
6.	Be actively involved in managing his/her condition/problem?
7.	Tell you if he/she is not following the treatment plan?
8.	Respect your time?
9.	Respect personal boundaries?
10.	Not make unreasonable demands?
11.	Not manipulate the office visit for secondary gain (e.g., for inappropriate disability certification or prescription of controlled substances)?
12.	Keep his or her appointments?

Table S2. All tools implemented in validation study

Measured construct	Name of the tool	Authors	No. of items	Answers type
Dispositions to trust (self-assessment) and beliefs on trust in specific social contexts (regarding other people). It consists of 3 subscales: benevolence, integrity and competence of specific professional groups (herein: medical doctors).	The Disposition to Trust & Trusting Beliefs Measure	McKnight et al., 2002	20 statements	7-point Likert scale from 1 (strongly disagree) to 7 (strongly agree)
Generalized trust in people	General Trust Scale	Yamagishi & Yamagishi, 1994	7 statements	6-point Likert scale from 1 (strongly agree) to 6 (strongly disagree)
Burnout – consisted of two subscales: exhaustion and distance	Oldenburg Burnout Inventory	Demerouti & Bakker, 2007	16 statements	4-point Likert scale from 1 (strongly agree) to 4 (strongly disagree)
The employee's self-efficacy - generalized belief that, regardless of the circumstances, they are able to implement their own plans and intentions	Self-efficacy subscale from the Copenhagen Psychosocial Questionnaire COPSQ II	Pejtersen et al., 2010	6 questions	4-point Likert scale from 1 (completely matches) to 4 (not at all)
Overall degree of employee satisfaction with their job	Job Satisfaction subscale from the Copenhagen Psychosocial Questionnaire COPSQ II	Pejtersen et al., 2010	4 questions	4-point Likert scale from 1 (very satisfied) to 4 (very dissatisfied)
Traits of the "Big Five": neuroticism, extroversion, conscientiousness, openness to experience and agreeableness	Ten-Item Personality Inventory	Gosling et al., 2003	10 statements	7-point Likert scale from 1 (strongly disagree) to 7 (strongly agree)

Table S3. Medical specialties (N = 307).

	N	%	Valid %	Cumulative %
Allergology	3	1.0	1.0	1.0
Anesthesiology and intensive care	16	5.2	5.2	6.2
Cardiac surgery	2	.7	.7	6.9
Cardiology	20	6.5	6.6	13.5
Clinical genetics	1	.3	.3	13.8
Clinical immunology	1	.3	.3	14.1
Clinical oncology	2	.7	.7	14.8

Radiology and diagnostic imaging	12	3.9	3.9	96.4
Rheumatology	2	.7	.7	97.1
Thoracic surgery	2	.7	.7	97.8
Vascular surgery	5	1.6	1.6	99.4
Urology	2	.7	.7	100.0
Total valid	305	99.3	100.0	
Missing data	2	.7		
Total	307	100.0		

Table S4. Polish version of PTPS (Skala Zaufania do Pacjenta)

Opis: Na ile jest Pan pewien/jest Pani pewna, że ten pacjent/ta pacjentka...	
1.	Dostarczy Panu/Pani wszystkich informacji medycznych, których Pan/Pani potrzebuje?
2.	Poinformuje Pana/Panią, gdy nastąpi poważna zmiana w jego lub jej stanie zdrowia?
3.	Powie Panu/Pani o wszystkich stosowanych terapiach?
4.	Rozumie, co mu/jej Pan/Pani mówi?
5.	Postępuje zgodnie z zalecanym przez Pana/Panią planem leczenia?
6.	Będzie aktywnie zaangażowany/zaangażowana w radzenie sobie ze swoim stanem/problemem zdrowotnym?
7.	Powiedziałby/powiedziałaby Panu/Pani o nieprzestrzeganiu planu leczenia?
8.	Będzie szanował/szanowała Pana/Pani czas?
9.	Będzie szanował/szanowała Pana/Pani granice osobiste?
10.	Nie będzie stawiał/stawiała nieuzasadnionych żądań?
11.	Nie będzie wykorzystywał/wykorzystywała wizyty lekarskiej do uzyskania bezpodstawnych świadczeń medycznych (np. nienależnego orzeczenia o niepełnosprawności lub nieadekwatnej recepty)?
12.	Będzie dotrzymywał/dotrzymywała terminów swoich wizyt?

Note. Skala odpowiedzi: 1 = całkowicie niepewny/niepewna; 2 = raczej niepewny/niepewna; 3 = trudno powiedzieć; 4 = raczej pewny/pewna; 5 = całkowicie pewny/pewna
