

- cell division
- VEGFA-VEGFR2 signaling pathway
- Signaling by Rho GTPases, Miro GTPases and RHO
- intracellular protein transport
- Vesicle-mediated transport
- Cellular responses to stress
- response to hormone
- tube morphogenesis
- carbohydrate derivative biosynthetic process
- Signaling by Receptor Tyrosine Kinases
- negative regulation of cellular component organization
- organelle localization
- supramolecular fiber organization
- Hemostasis
- positive regulation of cell death
- Organelle biogenesis and maintenance
- positive regulation of cell cycle process
- Cytokine Signaling in Immune system
- ossification
- heart development
