

Table 2: Pearson Correlation Coefficients of the cumulative dose of caffeine and change in length, weight and HC z-score from birth to 37 weeks' CGA or discharge, whichever was sooner.

Pearson Correlation Coefficients of the cumulative dose of caffeine N = 308			
	Length delta z-scores	Weight delta z- score	HC delta z-score
Caffeine (mg/kg)	-0.23	-0.26	-0.13
p-value	<.0001	<.0001	0.024
