

*Supplement Figure S1A-C. Bland Altman (BA) plots showing strong repeatability of cell count, particle size and brightness across cross-sectional images of same eye*

*Dashed line = central agreement line; dotted line = 95% limit of agreement, unbroken grey line = 99% limit of agreement*

S1A: BA plot of particle count repeatability, units=particles per cross sectional image

S1B: BA plot of particle size, units=size in pixels

S1C: BA plot of particle brightness, units=brightness on luminance scale from 0 (darkest) to 100 (brightest)
