

Supplementary Table 3. Mean, standard deviation, minimum and maximum values of bone area fraction occupancy (BAFO) for SCD and OCD groups after 21- and 28-days post-implantation.

Period		BAFO (%)				
(Days)	Group	Mean (n=5)		SD	Min	Max
14	SCD	47.96		5.37	43.12	57.14
	OCD	49.99		6.81	41.20	57.35
28	SCD	65.53	*	6.22	59.69	72.75
	OCD	61.76	*	4.45	57.87	66.57

Abbreviations: BAFO (bone area fraction occupancy); SD (standard deviation); Min (minimum); Max (maximum).

(*) Significant difference vs. the same group in the previous experimental period.
