

Supplementary Table 2. Mean, standard deviation, minimum and maximum values of bone area fraction occupancy (BAFO) and bone-implant contact (BIC) for SCD and OCD groups after 21- and 28-days post-implantation.

Period		BAFO (%)					Period		BIC (%)				
(Days)	Group	Mean (n=5)		CI	Min	Max	(Days)	Group	Mean (n=5)		CI	Min	Max
14	SCD	47.96		41.29 - 54.64	43.12	57.14	14	SCD	66.09		49.80 – 82.37	51.43	77.99
	OCD	49.99		41.52 - 58.46	41.20	57.35		OCD	55.97		43.63 – 68.31	44,12	68.54
28	SCD	65.53	*	57.80 - 73.27	59.69	72.75	28	SCD	82.27	*	78.08 – 86.47	76.81	85.20
	OCD	61.76	*	56.24 - 67.29	57.87	66.57		OCD	74.30	*	67.99 – 80.61	67.21	81.56

Abbreviations: BAFO (bone area fraction occupancy); BIC (bone-implant contact); Min (minimum); Max (maximum); CI (confidence interval at 95% of significance. (*) Significant difference vs. the same group in the previous experimental period.
