

Supplementary Figure 3. Ethanol production and ethanol tolerance of raisin-isolated yeasts. (A) Growth and ethanol production by *S. pombe*, *S. octosporus*, and *Z. rouxii* isolated from the water squeezed from raisins (n = 3, mean $\pm$ SD). (B) Effects of spiked ethanol on the growth of the isolates (n = 3, mean $\pm$ SD). OD₆₀₀ was measured on Day 7.
