

Digital Shoreline Analysis of Narmada Estuary (1972 to 1995)

Digital Shoreline Analysis of Narmada Estuary (1995 to 2018)

Shoreline change in terms of EPR during pre (1972 to 1995) and post (1995 to 2018) dam period

Morphological changes in the Narmada estuary (a) Extreme flow scenario (April 1994 to November 1994) (b) Short term non flood period during pre-dam scenario (November 1993 to April 1994) (c) Long term non flood period in post-dam period (October 2015 to October 2018) (e) quantified morphological changes in all the three scenarios
