

Supplementary Figure 2

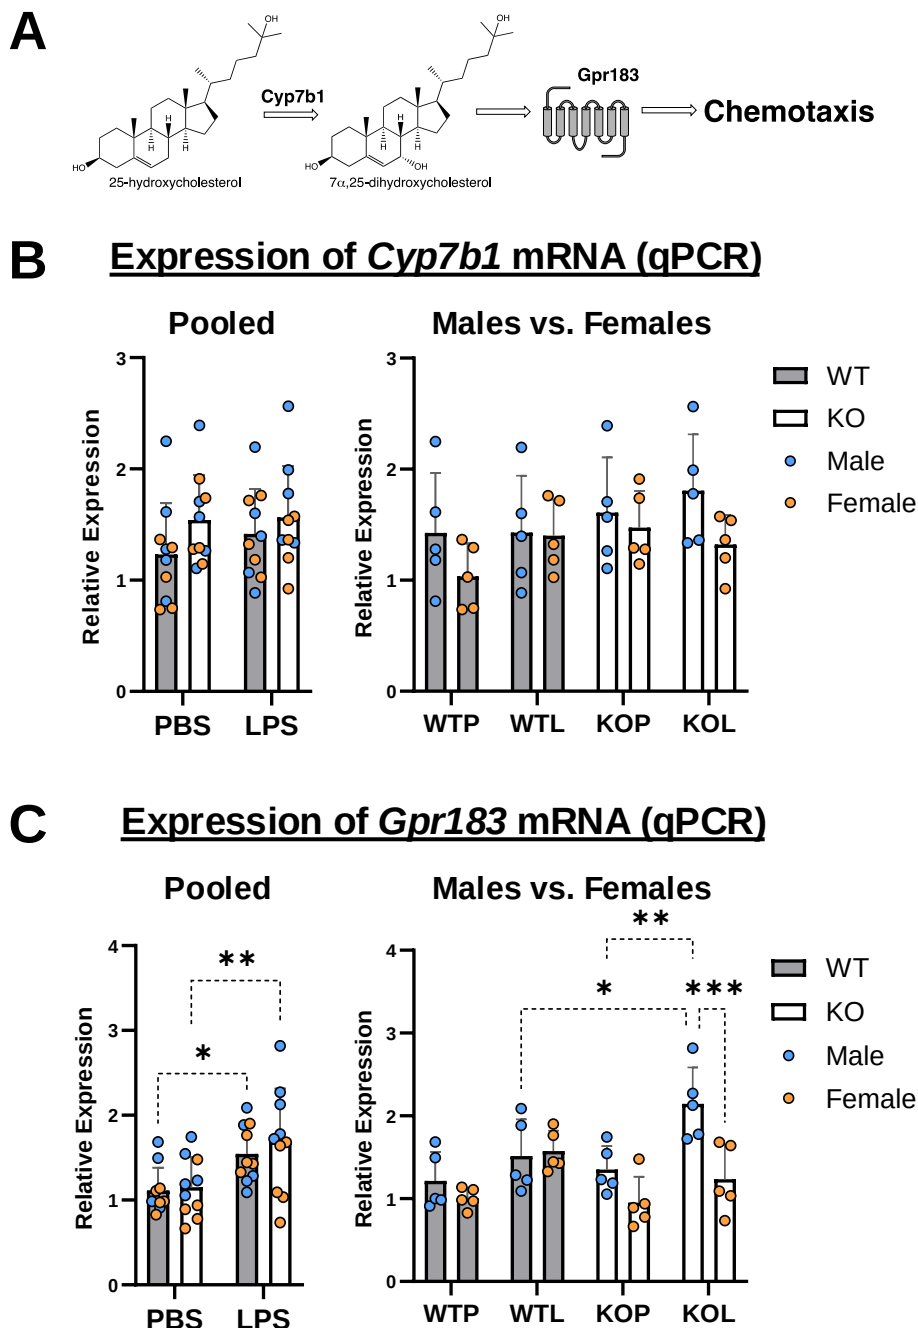

Figure S2: Expression of *Cyp7b1* and *Gpr183*. (A) Schematic of 25HC pathway leading to chemoattraction of GPR183 expressing leukocytes. (B) Relative expression of *Cyp7b1* mRNA measured by qPCR - pooled (left) and sex-segregated (right). (C) Relative expression of *Gpr183* mRNA measured by qPCR - pooled (left) and sex-segregated (right). Data are presented as mean values $\pm$ SD. Statistical significance was defined using a two-way ANOVA with Fisher's LSD or Tukey's post-hoc test (* $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$).
