

Supplementary Fig. S1

Supplementary Fig. S1: The predicted price results for all agricultural commodities with a 28-day rolling window size, window sizes of 45 (left panels) and 60 (right panels), and a prediction horizon of 14 days. The black curve represents the actual price, and the red, pink, green, and blue curves represent the predicted ones of StemGNN, T-GCN, Univariate stacked LSTM, and Multivariate stacked LSTM, respectively.
