

Supplementary Information

Glossary

Term	Definition
Medicare	Medicare is Australia's universal health insurance scheme. Medicare pays for some or all of the costs of various medical services, including services delivered in public and private hospitals. It ensures all Australians have equitable access to health care when they need it, regardless of where they live or their ability to pay. For more information: https://www.health.gov.au/topics/medicare?language=und
National Disability Insurance Scheme (NDIS)	The National Disability Insurance Scheme (NDIS) provides support to eligible people with disability, their families and carers. It is jointly governed and funded by the Australian Government, and participating state and territory governments. The National Disability Insurance Agency (NDIA) helps to implement the NDIS by providing information and referrals, empowering people with disability and providing service providers with transparency. For more information: https://www.ndis.gov.au/
National Health and Medical Research Council (NHMRC)	The National Health and Medical Research Council (NHMRC) is the main statutory authority of the Australian Government responsible for medical research. As an independent arm of the Department of Health, the NHMRC funds high quality health and medical research, builds research capability in Australia, supports the translation of health and medical research into better health outcomes, and promote the ethics and integrity in research. For more information: https://www.nhmrc.gov.au/
Australian Institute of Health and Welfare (AIHW)	The AIHW is an independent statutory Australian Government agency producing authoritative and accessible health and welfare statistics. AIHW aims to improve the health and welfare of all Australians by making available information and statistics that can help shape and improve the health of our community through better services and programs. AIHW provides data services including data integration. For more information: https://www.aihw.gov.au/
Data Integrating Authority	Integrating Authorities are agencies ultimately accountable for the implementation of data integration or linkage projects. Accredited Integrating Authorities are assessed by the Australian Government Oversight Board as having the infrastructure and capability to undertake high risk data integration projects by meeting a set of criteria agreed by the Commonwealth Portfolio Secretaries, including being subject to relevant privacy legislation. For more information: https://toolkit.data.gov.au/data-integration/roles-and-responsibilities/integrating-authorities.html

Secure Unified Access Environment (SURE)	SURE (Secure Unified Research Environment) is a secure platform for the sharing and analysis of sensitive health and other data. SURE offers custodians a flexible and trusted way to share health data with the research community, while also giving researchers access to approved linked data. For more information: https://www.saxinstitute.org.au/solutions/sure/
Centre for Victorian Data Linkage (CVDL)	The Centre for Victorian Data Linkage (CVDL) is part of the Victorian state government Agency for Health Information (VAHI), which is Victoria's end-to-end health data agency. The CVDL are Victoria's specialist data linkage unit and provide a range of services to researchers and other Victorian Government departments. The CVDL maintains the Victorian Linkage Map (VLM) and Integrated Data Resource (IDR), a collection of almost 40 datasets which are linked on a monthly basis. For more information: https://vahi.vic.gov.au/ourwork/data-linkage
Victorian data Access Linkage Trust (VALT)	The Victorian data Access Linkage Trust (VALT) is a secure online platform developed by the Centre for Victorian Data Linkage (CVDL) for release and analysis of linked, de-identified data for approved projects. For more information: https://vahi.vic.gov.au/ourwork/data-linkage/valt-information-and-faq
Data Linkage Queensland (DLQ)	The Statistical Analysis and Linkage Unit within the Statistical Services Branch of Queensland Health is also known as Data Linkage Queensland (DLQ). DLQ routinely links many Departmental and other health-related datasets, and performs data linkage to facilitate and promote health service planning, management, monitoring and evaluation, and research within Queensland. Additionally, DLQ is responsible for much of Queensland's health data linkage for Commonwealth requirements, national committees, and cross-jurisdictional research projects.
