

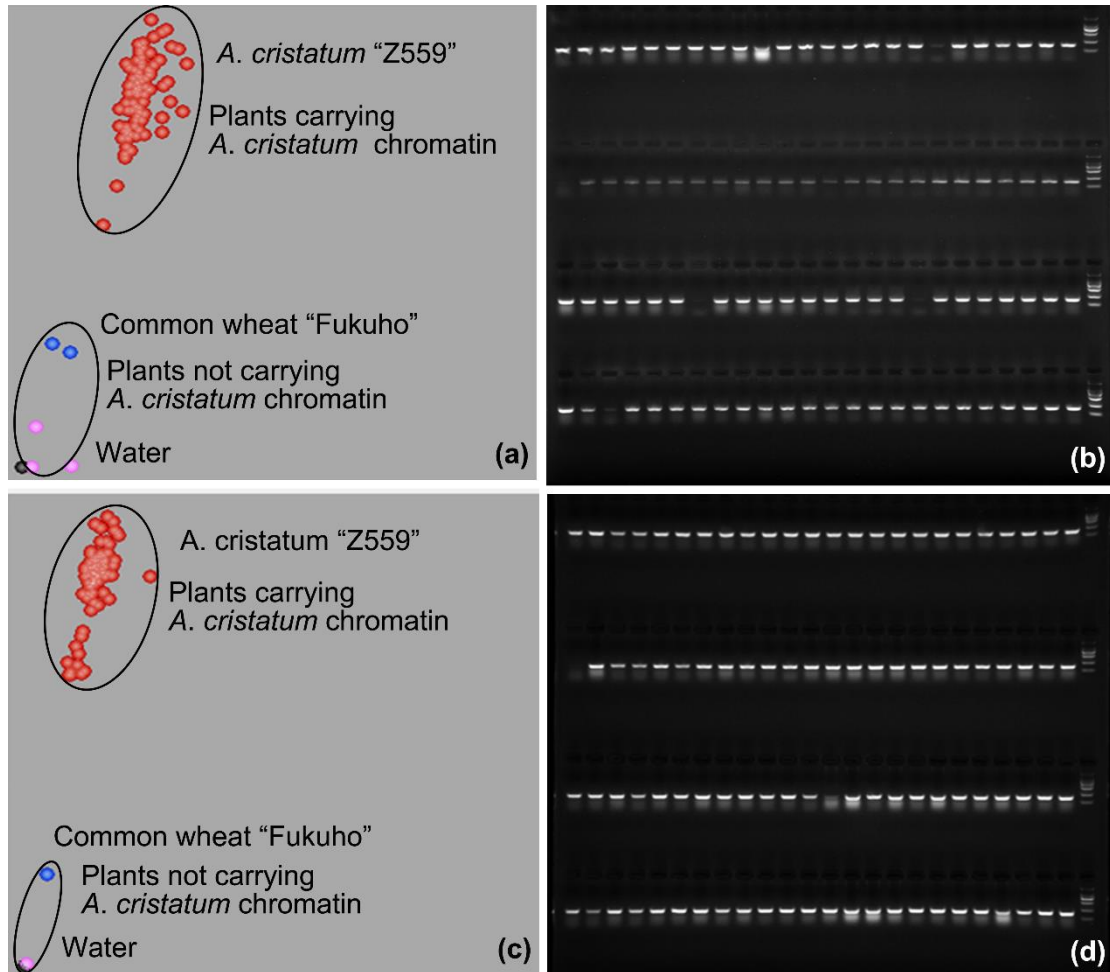

Fig. S6 Comparison of the results of the KASP markers and the gene markers relying on agarose gel electrophoresis. (a) and (b) indicated the results for the KASP marker Agr4080kps-2 and the gene marker Agr4080-3, respectively; (c) and (d) indicated the results for the KASP marker Agr6971kps-4 and the gene marker Agr6971-3, respectively
