

Supplementary information

Sensitivity analysis

SI Fig 1. Overall cumulative exposure response association. Cumulative RR is computed by summing the log RR over the lag period (0 through 5 days inclusive). The effects are centred at the reference level (solid diamond = 4.7 °C).

SI Fig 2. Overall cumulative exposure response association. Cumulative RR is computed by summing the log RR over the lag period (0 through 15 days inclusive). The effects are centred at the reference level (solid diamond = 4.7 °C).
