

# Supplementary Fig 1:

**Supplementary Figure 1: Cripto-1 attenuates TGFβ1 and act A signalling.** Cripto-1 (1μg/ml) attenuated Smad3 transcriptional activation induced by **(A)** TGFβ1 (0.5ng/ml) and **(B)** actA (2ng/ml) as measured by CAGA<sub>12</sub>-luciferase activity (\*\*p<0.01, \*\*\*\*p<0.0001).
