

Supplementary Figure 2: Correlation of annotated cell types between 5T platforms in ICGNG. Heatmaps show correlation of annotated cell types between (a) CostMx and MERFISH, (b) Xenium-UM and MERFISH, (c) CostMx and Xenium-UM, and (d) Xenium-UM and Xenium-MM of ICGNG based on shared genes. Red and blue colors represent high and low Pearson's correlation between celltypes, respectively. Correlation coefficients are written on heatmap cells.
