

Assessments of the attitude and fears of the medical fraternity of Pakistan regarding artificial intelligence.

We are conducting a research study on the attitudes and fears of healthcare workers in Pakistan towards artificial intelligence. The purpose of this study is to gain a better understanding of how healthcare professionals in Pakistan perceive the use of AI in their field. This information will be used to inform decisions about the adoption and implementation of AI in the healthcare sector.

As a participant in this study, you will be asked to complete a questionnaire that will take approximately five minutes to complete. Your participation in this study is voluntary and you may choose not to participate or to withdraw at any time without any negative consequences.

Please be assured that your confidentiality will be respected and no personal information, such as your name or any other identifying details, will be collected or shared. You will not be compensated for participating in this study.

If you have any questions or concerns about the study, or if you experience any discomfort or inconvenience while participating, please do not hesitate to contact us.

Thank you for considering participating in our research project. Your participation is greatly appreciated
