Supplementary Table S2. Multivariable logistic regression models evaluating the association between walkability categories and sarcopenia, adjusted for demographic and socioeconomic factors, marital status, and further including comorbidities with CVD without stroke and/or BMI categories ($p < 0.05$, **0.01 or ***0.001). For the model including BMI categories, only those with available data for BMI were used (291 sarcopenia cases and 315 control subjects). COPD: chronic obstructive pulmonary disease, CVD: cardiovascular diseases.
