

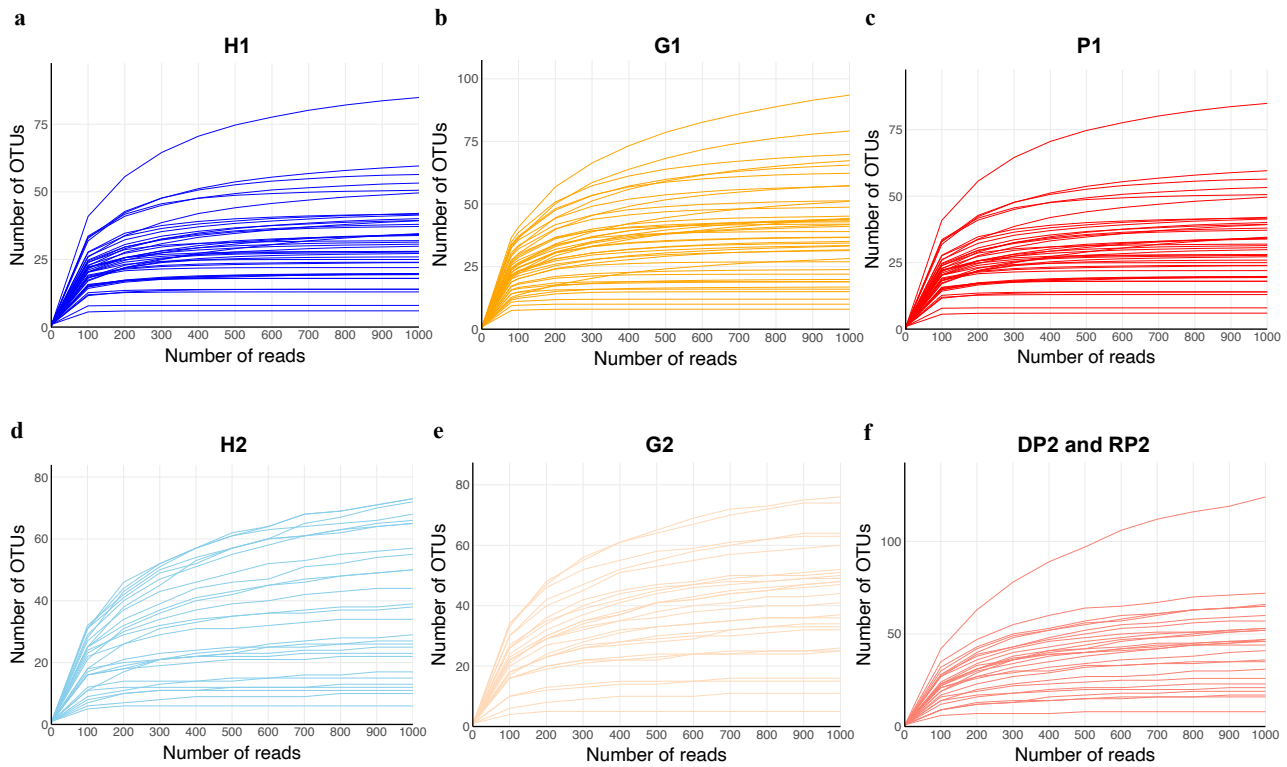

Fig. S2

Supplementary Fig. S2 Rarefaction curves of pre- and post-treatment bacterial samples. Rarefaction curves show the number of observed OTUs and the sufficiency of their read counts. (a-c) Pre-treatment samples (H1, G1, P1) from 42 subjects with sufficient read counts were used. (d-f) Post-treatment samples (H2, G2, DP2 and RP2) with sufficient read counts were used.
