

Supplementary figure 1: Protein expression of CD86 after treatment with various concentrations of the cathelicidin MPX

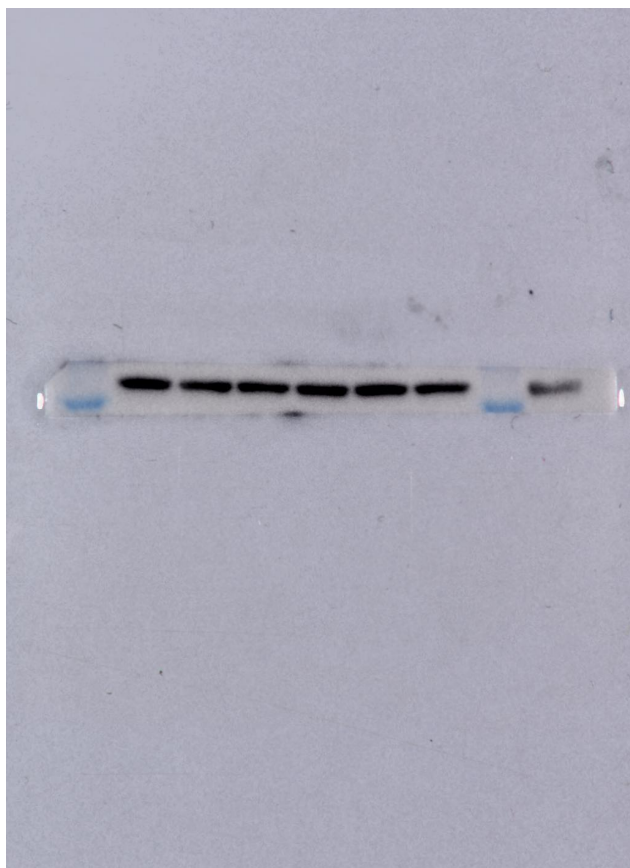

Supplementary figure 2: Expression of CD80 protein after treatment of the antimicrobial peptide MPX at different times

Supplementary figure 3: Protein expression of CD80 after treatment with various concentrations of the cathelicidin MPX

Supplementary figure 4: Expression of MHC I protein after treatment of the antimicrobial peptide MPX at different times

Supplementary figure 5: Protein expression of GAPDH after treatment with various concentrations of the cathelicidin MPX

Supplementary figure 6: Expression of GAPDH protein after treatment of the antimicrobial peptide MPX at different times
