You are invited to MCW Cancer Center's Careers in Clinical Oncology and Cancer Research Symposium on Saturday, September 30 in the Alumni Center at the Medical Education Building at the Medical College of Wisconsin, 8701 Watertown Plank Road, Milwaukee, WI. This second annual event creates a space for medical students to engage in hands-on learning through interactive case workshops, networking and mentorship opportunities, and exploring the breadth of oncologic clinical practice and research. Attendees will also have an opportunity to connect with MCW residents and faculty who will share insights and experiences working in clinical oncology and cancer research. Breakfast and lunch will be provided.

Register here (pre-registration is required):
