

Editing Certificate

This document certifies that the manuscript listed below has been edited to ensure language and grammar accuracy and is error free in these aspects. The logical presentation of ideas and the structure of the paper were also checked during the editing process. Furthermore, a technical review of the manuscript contents was performed. The edit was performed by professional editors at Editage, a division of Cactus Communications. The author's core research ideas were not altered in any way during the editing process. The quality of the edit has been guaranteed, with the assumption that our suggested changes have been accepted and the text has not been further altered without the knowledge of our editors.

MANUSCRIPT TITLE

Exosomes from human umbilical cord-derived mesenchymal stem cells alleviate osteoarthritis by balancing the synthesis and degradation of cartilage extracellular matrix and regulating macrophage polarization
