

Assessing the extent to which the goals of teaching practical courses in the curriculum of post-graduate dental fields have been achieved from the perspective of participants in the National Board exam

Field of study: Periodontics

University of Education:..... Dental work experience.....

Dear colleague, this questionnaire is designed to improve clinical skills training in specialized groups of dental schools in the country. We kindly ask you to actively participate in this important matter by answering accurately and choosing one of the options: poor, average, good, excellent, and completing other question options.

A) Overall assessment

Row	Index	Excellent	Good	Average	Poor
1	Quality of basic science courses				
2	Quality of interdisciplinary courses				
3	Quality of the faculty members of the group				
4	Number of faculty members in the group				
5	Quality of treated clinical cases				
6	Number of clinical cases treated				
7	Overall course evaluation				

- What specific skills do you need additional training in after graduation?

.....  
 .....  
 .....

Explanation..... :

b) How do you evaluate the impact of post-doctoral course training on acquiring the following clinical skills?

Row	Skill	Excellent	Good	Average	Poor
1	Student education				
2	Research Method				
3	Professional ethics				
4	Forensic Medicine Laws				
5	Infection control				
6	Clinical photography				
7	Clinical pharmacology				
8	Medical emergencies				
9	Evaluating articles				
10	Thesis				
11	Treatment plan for periodontal patients				
12	Non-surgical periodontal treatments				
13	Periodontal flap				
14	Crown lengthening Surgery				
15	Gingivectomy				
16	GTR				
17	Soft tissue grafting				
18	Root coverage				
19	Exposure of impacted teeth				
20	Dental lasers				
21	Treatment plan for implant patients				
22	Overdenture implants				
23	Posterior implants				
24	Aesthetic implants				
25	Immediate implant				
26	Peri-implantitis				
27	Horizontal augmentation				
28	Vertical augmentation				
29	Closed sinus lift				
30	Open sinus lift				
31	Autogenous bone graft				
32	Patient follow-up				

Thank you
