

A

Chao1

**B**

Richness

**C**

Bray_Curtis PCoA

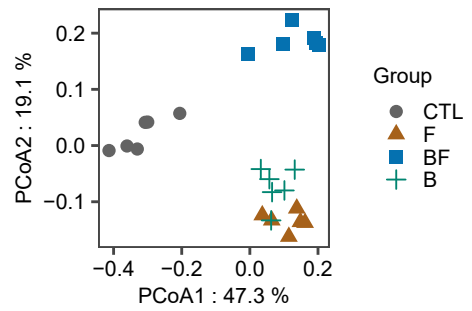

Figure S1. Alpha diversity and beta diversity of rhizosphere bacterial communities. (A) Chao1 index. **(B)** Richness of bacterial communities. Different letters indicate significant difference based on Welch's ANOVA, Dunnett's posthoc test ($p < 0.05$). **(C)** Principal Coordinates Analysis (PCoA) of the rhizosphere bacterial community based on the Bray-Curtis distance. $R^2 = 0.74$, $P < 0.01$ (PERMANOVA, Adonis).
