To Whom It May Concern,

The Ethics Review Board (ERB) of AIMS Hospital has reviewed the case report titled "Navigating Zinner Syndrome: A Tale of Resilience and Multisystem Challenges," submitted by all authors. The review included an assessment of the manuscript's compliance with ethical principles for research involving human participants, data confidentiality, and patient consent.

The ERB confirms that:

1. The case report adheres to institutional and international ethical guidelines for reporting on clinical cases.
2. All necessary measures have been taken to anonymize patient data to protect confidentiality.
3. Written informed consent for publication was obtained from the patient's next-of-kin, and the authors have provided sufficient documentation to confirm this.

The ERB acknowledges the scientific and educational value of this case report and approves its publication. This approval is valid for submission to reputable journals, including BMC Urology, as outlined in the application.

Should further clarification or documentation be required, please contact the ERB via email at sadikmemon@gmail.com
