

Mobile Health Initiative - Volunteer Survey

You have been selected to participate in our research study whose main purpose is to understand how volunteers perceive and benefit from their experience assisting with our Mobile Health Initiative (MHI), and to explore how this experience may impact their future careers in medicine. In order to collect data for this research, we have designed an anonymous survey which you may fill out at your own leisure. This survey consists of multiple choice questions and short text responses. You do not need to complete the survey if you do not want to. There is no harm or benefit. By submitting this survey, you are consenting to having your anonymous responses be used for research.

After you submit this survey, there will be a link to another form where you will enter just your name and email. By doing this, your responses will be kept anonymous. This will allow us to communicate with you regarding the drawing of \$50 gift cards.

If you have any questions about the survey, please contact Jameleddine Benhamida (benha057@umn.edu).
