

APPENDIX I
PARTICIPANT INFORMATION SHEET

Study Title: Experiences and consequences of stigmatization on women living with obstetric fistula in Health Facilities within the Greater Banjul area and West Coast Region I of the Gambia.

You are invited to partake in this study. Before you decide to participate you need to understand why the research study is being done and what it will involve. Please take time to read the following information or get the information explained to you in your language. Listen carefully and feel free to ask if there is anything that is not clear or you do not understand. You may wish to consult your spouse, family member, friends or others before deciding to take part in the study.

If you agreed to join the study, you will need to sign or put a thumbprint on a consent form saying you agree to be in the study. Participation is voluntary.

The research study is conducted to explore the experiences and consequences of stigma on women living with obstetric fistula in health facilities within Greater Banjul and Western Coast Region 1 of The Gambia. Obstetric Fistula has a high burden on survivors' lives and the society they live in. Exploring what they have or had experienced and the socioeconomic consequences they face will provide a better understanding of what they experienced and consequences of living with obstetric fistula. In addition, your participation as a survivor will assist in making recommendations in improving the quality of life for affected women as well as help them to reintegrate into their communities and empower them. Also this research will add to existing knowledge, serve as a supporting tool for policy guide and implementation.

The research will involve a face to face individual interview or a focus group discussion of the your bio data, experiences and consequences of living with obstetric fistula which may take about 30 min to 45minutes

Interview Guide (Women with obstetric fistula) V1.1

Interview no _____ **Location** _____

Date: _____
