Medical student survey INTERACT 2, Phase 2

Introduction

Thank you for participating in the survey. Your GP clinic's registrar has undergone teacher training and has completed a teaching session(s) with you as part of the University of Melbourne INTERACT 2 research project.

This survey aims to assess the impact of the INTERACT 2 project on your attitudes, knowledge, and experiences related to general practice. Your responses will help us improve the training and support for future general practitioners and medical students. There will be an option in the survey to share your answers with your GP registrar for the purposes of their own feedback (optional), otherwise, your survey will remain anonymised for the purpose of the study.

This survey should take approximately 15 minutes to complete—there are less than 5 open ended questions, so please take your

time to consider your response. A \$25 gift card will be provided to you on completion of the survey as a token of our appreciation.
