

A**B****C**

Supplementary Figure 5.

No ER stress was observed in the retina of Wfs1 KO mice. (A) Transcript level of Bip quantified by RT-qPCR in retina of 6.5 month old WT (in blue) and KO (in red) mice. (B) Transcript level of Chop quantified by RT-qPCR in retina of 6.5-month-old WT and KO mice. (C) Transcript level of Xbp1s quantified by RT-qPCR in retina of 6.5 month old WT and KO mice. The mRNA levels were normalized to the reference gene L27. n=4. Results are shown as mean \pm SEM.
