

The English language version questionnaire for standardized patients

Thank you very much for participating in this research project. Your feedback is highly valuable and will contribute to improving the training and educational experience for both standardized patients and students.

Please take a moment to read each statement carefully and indicate your level of agreement by marking the appropriate box (1 to 5) according to the following scale:

5 = Strongly Agree

4 = Agree

3 = Neutral

2 = Disagree

1 = Strongly Disagree

There are **no right or wrong answers**—we are interested in your honest opinion based on your experience.

Please complete all sections of the questionnaire. Thank you for your time and contribution!

Name

Please indicate your level of agreement with the following:	1	2	3	4	5
--	----------	----------	----------	----------	----------

The duration of neurological examination and feedback training was adequate and appropriate.

I am satisfied with the training content on "identification of correct examination techniques."

I am satisfied with the training module covering "recognition of incorrect examination maneuvers and provision of constructive feedback to students."

Periodic refresher training is essential for SPs participating in neurology physical examination feedback education.

This training format significantly enhances my confidence and competence as a standardized patient.

I recommend implementing this SP feedback training model more widely.

From an SP perspective, this training has improved students' neurological examination skills.

From an SP perspective, this training has enhanced students' communication skills during neurological examinations.
