“GROUP CARE FOR THE FIRST 1000 DAYS”

Topic List Rapid Evaluation: Focus Groups with Facilitators

<i>Country Leader Belgium:</i>	Prof. Dr. Katrien Beeckman
<i>Local research team Belgium:</i>	Astrid Van Damme Florence Talrich
<i>Project Dates:</i>	Project Start Date: January 01, 2020 Project End Date: December 31. 2023
<i>Grant Agreement Number</i>	848147 (Horizon 2020)

TOPIC GUIDE FOR FOCUS GROUP INTERVIEWS WITH FACILITATORS

1) How far do you feel the Group Care affects women's experiences of ANC/PNC?

- Prompt if needed only: **What do you think were the key features of this?** (a little more depth or clarification as needed according to initial response)
- PROMPT: Do you still provide traditional ANC/PNC? Do you feel the quality of care you offer is different in the two models?
- PROMPT: Did any women transfer back to 1-2-1 care? Why?

2) How do you feel about the composition of the groups – e.g. diversity in language, culture, gestation, education, obstetric/social risk.

- A): Including high-risk women:
 - When did this work well and when didn't it?
 - Did high-risk women stay in their Group Care despite having other appointments?
 - Did you think there were any particular benefits of it? (for individual high-risk women/for the group)
- B: Did you have anybody who spoke little (main local language)? How did you deal with that?
 - Facilities/involvement of health advocates or interpreters
 - Ensuring women are included
 - Managing time and interaction
- C: How did including/not including partners work in your sessions?
 - How often – e.g. some or all visits? How was this decided?
 - Ensuring partners are included
 - Managing time and interaction (including dynamics – partners being included but not dominating or speaking for women)

3) Thoughts and feelings about having facilitated Group ANC/PNC

- PROMPT: How did this experience impact on your knowledge and confidence levels?
- PROMPT: How did this experience impact on your sense of wellbeing/stress levels?

4) How did it feel to work in partnership with another facilitator to facilitate Group Care?

- PROMPT: Give examples to ways it was challenging or rewarding

5) Specific aspects of facilitation that they found most challenging

- PROMPT: How would you do things differently if you were to do it again?

6) Do you feel Group Care would work as part of normal ANC/PNC (as part of the national system)?

- PROMPT: What support is needed (for women and midwives/care providers) to integrate it?
- PROMPT: Do you think there are opportunities to extend Group Care into the antenatal/postnatal period (ask as appropriate to what stage they offered)?
