

# Clinical experience with an online adaptive radiotherapy for prostate cancer: successful treatment time optimization

## 1 Supplements

**Table 1:** Data selection

Step	Number of sessions (patients)
All Ethos sessions delivered (Jul 2023 – Dec 2024)	1977 (89)
Selected: primary prostate cancer only	1380 (69)
Excluded: scheduled (non-adaptive) plans	–7
Excluded: incomplete time tracking	–2
Excluded: VMAT plans (atypically long calculation times)	–5
Final dataset for analysis	1366 (69)

**Table 2:** Data filtering

Filter	Sub-analysis	
	Manual vs. automated PRW contouring	Without vs. with HyperSight
Learning phase	exclude	exclude
Sessions with HyperSight	exclude	include
Sessions without HyperSight	include	include
Manual PRW contouring	include	exclude
